PROFILE

Software Engineering student with a technical background in Java and database-driven applications. Actively involved in the Industrial Engineering Society, contributing to teamwork, communication, and organizational activities. Eager to learn and contribute to software development processes in a professional environment.

EDUCATION

YASAR UNIVERSITY B.SC. IN SOFTWARE ENGINEERING (2023 – PRESENT)

İZMİR TURKISH COLLEGE SCIENCE HIGH SCHOOL (2018- 2022)

PROJECTS

Web and Mobile Access Testing – İzmirim Kart

- (Selenium IDE, Java, JUnit, ISO 25010)

Conducted functional and UI/UX testing for web and mobile systems. Designed and executed manual and automated test cases (login, balance, QR features). Applied black-box techniques like BVA, EP, and use case testing. Collaborated in a 4-person team; delivered reports and automation scripts.

Bird Species Database Design – MySQL

- (MySQL, ER Modeling, SQL Scripting)

Developed a relational database with 9+ interlinked tables. Implemented weak entities and various relationship types (1:1, 1:N, M:N). Populated and normalized real-world bird data. Generated and exported a full SQL schema for deployment.

MyLibrary Book Management Application

- (Java, Swing, MySQL, JDBC)

Created a desktop application to manage a personal library, enabling book addition, deletion, editing, and searching. Implemented CRUD operations with MySQL via JDBC.

Java desktop application using Swing for UI design.

Applied object-oriented programming and manual testing.

Vodafone Future Challenge 2025 (Idea Competition): Designed a 5G-based drone logistics system (AirLink) and developed its business model and pitch presentation.

Project Management – Autonomous Delivery Drone Project

- (MS Project)

Planned and tracked a technology project using MS Project (WBS, schedule, milestones)

Managed resources, costs, and timelines; monitored critical path and progress

Supported data-based decisions for schedule and cost control.

TeaLog – Java Desktop Application - (Java, MVC, Design Patterns, MySQL)

Developed a desktop application using MVC architecture. Applied design patterns (Singleton, Observer, Strategy) for modular and maintainable code.

LANGUAGES

- English: B2
- German: A2

SKILLS / TOOLS

Communication	Teamwork	Time management	C / C++	SQL	CSS	Javascript
Adaptability	Problem-solving	Student engagement	Java	Excel	HTML	

CERTIFICATION & EVENTS

- Yaşar Career Days '24 – Transformation (7–8 December 2024)
 - Yaşar Sector Days '25 – Shaping the Future (3–4 May 2025)
 - Vodafone Future Challenge 2025- Idea Competition Participant(AirLink)
 - MATLAB Onramp
 - Introduction to Linear Algebra with MATLAB
 - Introduction to Cybersecurity (Cisco Networking Academy)
-
